

CITY OF SAN DIEGO
MEMORANDUM

DATE: September 27, 2007
TO: Fred Sainz, Director of Communications
FROM: Rick Reynolds, Assistant Chief Operating Officer
SUBJECT: Network (IP) Addresses for City Computers

The attached listing of network addresses (also known as Internet Protocol or IP addresses) for the PC systems assigned to the City Attorney's office located in the Civic Center Plaza building is being provided pursuant to your request of September 26, 2007 to the Office of the CIO.

Please note that any release or disclosure of this information could result a serious breach of system security and create a potential risk for unauthorized access into the City's network. While IP addresses in themselves may not be considered sensitive or confidential, the information could be combined with network logs or other trackable system information, resulting in individually identifiable information which would typically not be available for or subject to disclosure. In addition, disclosure of our internal IP addresses to any unauthorized parties would violate system security policies by providing information that could be used maliciously for "hacking", or gaining unauthorized access, to City systems (either internally or externally).

Rick Reynolds
